Venus Pipes & Tubes Limited

A Key Milestone in Pipe Spooling Business

Venus Pipes & Tubes receives Rs. 29 Crore Order Against Rs. 185 Crore LOI from Data Centre Customer for Pipe Spooling solutions

Dhaneti, Gujarat – 30th October 2026 : Venus Pipes & Tubes Ltd, one of the leading stainless-steel pipes / tubes manufacturers and exporters along with fittings in India announces today the receipt of order worth Rs. 29 crore for pipe spooling from a data centre customer, forming part of the Rs. 185 crore Letter of Intent (LOI) received earlier.

The order follows the commencement of operations at a part of the Company's dedicated pipe spooling manufacturing facility, which was commissioned ahead of the earlier planned timeline of December 2026. With production already underway, the Company is positioned to initiate execution and facilitate faster dispatch against the order.

The balance value under the LOI is expected to be converted into firm orders in a phased manner. The Company plans to operationalise the remaining manufacturing capacity over the next few months to support the anticipated business.

With increasing demand for end to end piping solutions, Company's expansion into pipe spooling represents an opportunity to broaden its value-added product portfolio and strengthen its participation in emerging industrial segments.

Commenting on the same, Arun Kothari, Managing Director, Venus Pipes & Tubes Ltd, said,

"The conversion of the LOI into a firm order marks an important step in translating the identified opportunity into business. We believe this order reflects the customer's confidence in our capabilities and the growing demand for value-added piping solutions in the data centre infrastructure segment.

We are encouraged by the opportunity and expect the balance value under the LOI to be converted into orders in a phased manner. Our pipe spooling capabilities will enable us to expand our value-added product portfolio, cater to evolving customer requirements and strengthen our presence across emerging industrial segments."
